Salt Lake 2, Oakland 3.  
Sacramento 4, Vernon 4.  
Other teams traveling.

SAN FRANCISCO, April 20.—The Bees lost the opener to the Oaks this afternoon by a three-to-two score. Carl Holling, Howard's pitching ace, was sent to the hill and latched on his fourth straight win. Lefty Lorenz did the honors for the Salt Lake club.

It was a real pitchers' battle for three frames, but the Bees got busy in the fourth and sent a pair of tallies. Marty Krug singled and was forced by Rumber, Bill swiped second and went to third when Mitze made a wild peg. Sheely hit off a double, scoring Rumber, Mulligan fanned, but Rumber got a hit that registered Sheely. The duke died stealing third.

The Oaks lost no time in grabbing three and going into the lead. Hamilton opened the third with a safe walk and reached third when Denny Willie doubled. Miller popped to Krug but Knight hit safely to score Hamilton and Willie. Knight stole second and was safe at third on Rumber's error. Guisto fanned. Arlett was safe on Krug's error. Knight scoring Mitze singled but Holling grounded out.

The Bees filled the corners in the eighth when Levenez was safe on an error by Guisto and Mager and John singled. Krug hit into a double play to end the inning. Giangiardi and Mitchell, youthful infielders were released by the Oaks to Spokane this afternoon. Hamilton, former Seal is filling in at short. Zeider was out of the game with a sore leg.

## America's Best Net Stars to Enter Meet

NEW YORK, April 21.—America's leading tennis players will compete in the British championship and the Davis cup preliminaries in England during June and July, according to an announcement here today by the United States lawn tennis association. The team will consist of William M. Johnston of San Francisco; R. Norris Williams, II, of Boston; William T. Tilden, II, of Philadelphia, and a fourth player yet to be selected. Will sail for England late in May or the first week in June. The players will be in charge of Samuel Hardy of New York, formerly of Chicago, and California, who will act as team captain and manager. All four players will be entered in the English singles and doubles championships to be played at Wimbledon beginning June 21. These matches will be followed, in all probability, by the United States versus France Davis cup play also on English courts.

## Rifle-Pistol Team to Represent America

NEW YORK, April 21.—Final arrangements were completed here today for the entry of a full complement of American rifle and pistol experts in the Olympic games shooting contests to be held at Beverloo, Belgium, July 22 to 31. The team will sail from this city on June 26 and is expected to arrive at the Belgium army range in time to allow two weeks of practice. Special tryouts will be held in various parts of the country during the next few weeks and the final trials, on which the team selections will be based, will be held at the United States marine rifle range at Quantico, Va., late in May and June.

# PENROSE TALKS AT SUGAR PROBE

## Church Official Tells of His Efforts to Act As Conciliator in Conflict

SALT LAKE, April 21.—Testimony of Charles W. Penrose, of the first presidency of the L. D. S. church, John A. Hendrickson and Lorenz N. Stohl, was offered yesterday in the hearing before the federal trade commissioner examiner of the complaint charging the Utah-Idaho Sugar company, Ernest R. Woolley, A. P. Cooper and E. F. Cullen with conspiracy to prevent competition in interstate commerce.

President Penrose testified principally to his efforts as a conciliator between Mr. Hendrickson and Mr. Stohl and Mr. Woolley, when the latter, as president of the West Cache company, was about to bring suit for the return of "secret profits" alleged to have been taken by the former.

The witness told of a meeting he arranged between the three men, in which he endeavored to bring them to an agreement to arbitrate. He testified that Mr. Woolley seemed willing to arbitrate if he could name the arbitrators. The name of Judge Harold H. Stephens of the Third district court was suggested. Mr. Penrose said, as the referee of the matter which was later tried and which resulted in a judgment for the plaintiff, the West Cache Sugar company.

In part of his testimony President Penrose told of the desire attributed to Mr. Woolley to have Mr. Stohl submit to judgment with a promise of later immunity in order that he might "rip Hendrickson up the back."

On redirect examination Mr. Hendrickson again told the history of the efforts he and Mr. Stohl made to establish an independent enterprise in Cache valley. He recited how L. R. Eccles, at that time manager of the Amalgamated Sugar company, upon learning of his project had told him "if you go on and build that plant you will never live long enough to forget the trouble you will cause yourself."

In reply to a question by Judge D. N. Straup, counsel for the Utah-Idaho company, as to whether the testimony referred to his client, Henry Ward Beer, special attorney for the commission, who is conducting the case for the government, said that every bit of evidence introduced is offered against all of the defendants as co-conspirators and individually Mr. Beer stated his intention of showing that the defendants in the Hendrickson case and others endeavored to prevent the Dyer Construction company of Cleveland from erecting plants for competitive or prospective competitors. The Dyer company is said to be one of the largest builders of sugar factories in the country.

Several letters between Mr. Hendrickson and the Dyer company were introduced into the record. In one of the letters to Mr. Hendrickson the Dyer company stated its desire to "cast its lot" with the Hendrickson and spoke of "certain interests" having a wholesome respect for the federal laws, and expressing the opinion that harmony could be secured.

Mr. Hendrickson testified that the friendly attitude of the constructors continued until the bids for the Amalgamated factory at Smithfield were to be opened, and revealed the president of the company as saying that he did not like to build a factory where it might interfere with existing companies.

Mr. Hendrickson continued his testimony regarding his relations with Mr. Woolley, who succeeded him as president of the West Cache, and read into the record the names of the present directors of the West Cache company, stating that none save Mr. Woolley has more than ten shares of stock; James Larson, D. M. Nielsen, H. D. Cole, H. L. Arnold, Joseph F. Featherstone, Ben C. Rich and Mr. Woolley, who, Mr. Hendrickson said, "apparently" has 5049 shares.

Cross Examination  
Cross examination again by Herbert R. Macmillan, counsel for Mr. Woolley and the Amalgamated, resulted almost immediately in the beginning of a lengthy debate with Mr. Beer, regarding a letter which Mr. Hendrickson had identified the signature, but which had not been offered in evidence. Mr. Macmillan wanted to read the letter and connect it as an answer to some of the Dyer correspondence, but Mr. Beer stated by his refusal to show it, holding it, he said, for future introduction. Judge Straup also demanded the letter, but without avail.

Mr. Stohl and he had been willing and anxious to sell the option he and Mr. Hendrickson had on the Canadian factory belonging to the Knight interests, and thought the offer by L. R. Eccles of the Amalgamated company of \$75,000 cash or two-thirds of the difference between the cost of building a new factory and the cost of the old plant and its removal to a new site in this country was most generous.

He followed Mr. Hendrickson in quoting L. R. Eccles as saying that the Amalgamated would make the new company pay \$7 a ton for its beets if it built in Cache valley when the prevailing price at the time was \$5.50. Mr. Hendrickson had refused to sell unless the plant were to be located in the West Cache district, he said.

English Coal to Italy if Agreement Made

LONDON, April 2.—England will furnish Italy with considerable more coal than she has at the present time and some raw materials if the tentative agreement just received is confirmed at a conference of representatives of the two countries to be held in London soon. The present plans are only roughly outlined, all the details being left to the conference.

An Arab drinks a dozen or more cups of coffee every day.

When the strike of machinists in the city was first called, last August, the employees of the state also walked out. However, an agreement was reached by which they should return to work and be allowed, dating from August 21 last, any increase in wages that might be obtained as a result of the strike. They are asking for \$1.00 a day increase.

Some members of the road commission argued yesterday that all industry must come to the open shop principle before the dollar can regain its full value.

DECLARE STRIKE OF STATE WORKERS OVER

SALT LAKE, April 21.—A final conference between the state road commission and the machinists union took place yesterday in which the commission decided to sustain its secretary, Ira R. Browning, state road engineer in the opinion that the strike begun eight months ago is over.

# GERMANY ASKS FOR BIG ARMY

## Seeks Treaty Modification So She May Retain General Staff and Officers

PARIS, April 21.—Germany has asked for a modification of the military clauses of the peace treaty so as to enable her to maintain larger armed forces than permitted by that pact.

The request was contained in a note handed to the French foreign office last evening, with the demand that it be sent to the supreme council at San Remo.

The note set forth that an increased force was necessary for the maintenance of order in the interior, and that, furthermore, the army would not accept an order for its dissolution.

The note further requests that Germany be allowed to retain the entire general staff and corps of officers, which means the entire framework of the active army.

Propose Withdrawal  
Withdrawal of allied troops from part of the Rhineland in consideration of immediate execution by Germany of certain financial obligations of the treaty of Versailles is proposed by Italy and Great Britain at the San Remo conference of the supreme allied council, says a dispatch to the Petit Parisien. Premier Millerand has refused to agree to this plan, it is said.

The Anglo-Italian program would include disarmament for Germany under threat of blockade, and the simultaneous inauguration of a policy of reconciliation, says the Mattin, which adds that, in view of M. Millerand's refusal to join them, Premier Nitti and Lloyd George are not likely to persist in carrying out their proposals.

Can't Tolerate Revolts.  
BERLIN, April 20.—The Belgian, French, British and Italian governments, through their charges d'affaires, have notified the German government that they cannot tolerate a government which is not inclined to execute the peace treaty, and that all revolutionary movements or a recrudescence of the late uprisings will only delay the economic re-establishment and revictualing of Germany.

Shut Out Aliens if With Radical Doctrines

BALTIMORE, April 21.—"If the United States cannot purge itself of the rabid element which has come to our shores and which is now a part of our population, I cannot prevent them from setting up the laws which we have set up for our protection, then the people will rise and demand that all aliens be shut out," said Representative Albert Johnson of Washington, last night before the state council of American Mechanics. He described the registration feature of the naturalization bill as placing a man "on probation."

WIDESPREAD REQUEST FOR A. C. CATALOGS

LOGAN, April 21.—So many requests for college catalogs have been coming to the office of the president of the U. A. C. from India, that Secretary Brimley has been keeping a classified list of them. This list shows that, in addition to many personal requests 141 schools and colleges have requested catalogs for 1920-21 and, in so doing, requests have come from 88 scientific and literary societies and from 63 newspapers.

The Utah Agricultural college has long been favorably known throughout India, especially for its work in irrigation and dry farming. The Student Body generally includes several students from India among its numbers.

WHOOPIING COUGH.

In this disease it is important that the cough be kept loose and expectoration easy. This is best accomplished by giving Chamberlain's Cough Remedy. That preparation also tends to liquify the tough mucus, making it easier to expectorate and renders the fits of coughing less frequent and less severe. It has been used in many epidemics of this disease with the best result. It contains no cocaine or other narcotic.

Anti-saloonist Against Vote by Ohio People

WASHINGTON, April 21.—Reversal of Ohio supreme court decrees sustaining which of the state constitutional referendum amendment and dissolving injunction proceedings brought to prevent the prohibition and woman suffrage amendments from being referred to the voters was asked in a brief filed with the supreme court today by Wayne B. Wheeler, general counsel for the anti-saloon league of America.

"If each state," the brief said, "may adopt its own method of ratifying an amendment the main purpose to be accomplished in amending the constitution would be easily thwarted. With forty-eight different kinds of referendum it would make the procedure for ratifying amendments to the constitution a complete farce."

SOLDIERS' HOMESTEAD BILL PASSES HOUSE

WASHINGTON, April 21.—The house of representatives passed the senate bill providing that any home-stead entryman who served in the army or navy during the war with Germany, and was honorably discharged because of physical incapacity incurred in the service, may commute his entry, without further residence or cultivation, and obtain title by paying \$12.50 per acre for his land. This applies to entrymen who had initiated entries before the outbreak of the war, and who had not made final proof at the time they entered the service.

The house also passed Representative James H. May's resolution authorizing the secretary of war to grant revocable permits for the removal of sand and gravel from the Fort Douglas military reservation to persons desiring to use the material in industries and manufacturing purposes within the state, the price to be fixed by the secretary. The bill has also passed the senate and is now before a conference committee.

# LOGAN BANKS IN GOOD CONDITION

## Examination Recently Conducted by Federal Inspector and State Examiner

LOGAN, April 21.—The banks of Logan City and Cache County were shown to be in excellent condition by the recently made examination of the Federal Reserve Inspector, accompanied by the state inspector according to President H. E. Hatch of Thatcher Brothers' Banking company. It developed from the exhaustive examination made by the bank examiners that Cache county is one of the very few districts that has completely financed itself up to the present time, said Mr. Hatch.

Logans' rapid growth during the past ten years has been the in no small measure to its ability to finance itself, according to Mr. Hatch. The Logan banks have total resources of \$5,676,325, with deposits aggregating \$4,787,214. Loans totaling \$2,938,810 have been made in every case to aid in the development of the county and thus the banks have been able to contribute most effectively to the community growth. The capital and surplus of these banks total \$572,500.

These figures indicate the size of the banking industry in Cache county and indirectly indicate the prosperity of the people. With the totals for the county banks added, an appreciable increase would be made in the above figures. In addition to the three millions of dollars loaned out for development purposes, the banks hold nearly a million dollars worth of government bonds and other sound securities.

"One feature that has contributed to the development of banking in Cache county has been the close co-operation that has existed among the banks. By means of a county association a valuable affiliation has been developed. The county banks are all closely allied with the Logan City banks and where the country has been unable to lend to concerns which required more than the bank was lawfully permitted to lend, such loans have been taken over by the city banks.

The money loaned has been largely to farmers, opportunities for agricultural development. The manufacturing interests of Logan, however, have borrowed largely from the local banks for their expansion."

# What Lies Back of Our Suits?

Here are businesslike answers to the question, "Why do so many well dressed men wear Dundee suits?"

## ALL WOOL FABRICS

The cloth is the foundation of good tailoring. Dundee controls the output of some of the largest woolen mills in the country, and every assertion about the superior quality of Dundee fabrics is strengthened by the Dundee reputation as reliable woolen merchants.

## Latest Correct Styles

That's the next consideration. All Dundee suits are up to date—they have all the latest fashion twists from the Fifth avenue designers of men's smart clothes.

## EXPERT CRAFTSMANSHIP

A good tailor can make a creditable suit of inferior material, but a poor tailor will ruin the finest cloth. Our tailors are artists in their line. They have all had years of experience as Union Tailors.

## Factory to You Guarantees Low Prices

The middlemen are done away with in the Dundee system. This, together with our large volume of business, in stores from coast to coast, individually tailored, \$30.00 and up

# French to Tax Back Profits of Wartime

PARIS, April 21.—The French government will sanction a bill in the chamber instituting a tax the object of which is to readjust retrospectively transactions in war supplies. The tax is calculated in such a way as to allow a maximum profit of ten per cent only to the producers and between 2 and 2.13 per cent to the middle men, according to the importance of the transaction.

A proposed amendment to the taxation bill in the chamber which would abolish government securities payable to bearer was defeated by a vote of 273 to 234. During the course of the debate Finance Minister Francois-Marschal offered an uncompromising objection on the ground that the bill was prejudicial to the interests of the treasury and the country.

# Lifeboat Is Evidence of Steamer's Sinking

BOSTON, April 21.—The finding of a lifeboat marked "William O'Brien" was reported by the steamer Port Saunders in a message relayed here by the coast guard cutter, Acushnet. It was found about 500 miles east of Philadelphia, close to the position from which the wooden steamer William O'Brien sent out distress calls on April 15.

# When You Paint Your House—

PATTON'S SUN-PROOF PAINTS

pick a paint that will give you the utmost in beauty and durability. You can find any number of paints that cost less per gallon than Patton's Sun-Proof Paints, but cheap paints are made cheaply. You can paddle lead and oil together yourself but you'll lose money in the end, because such mixtures wear only half as long as Sun-Proof Paint.

Patton's Sun-Proof Paints are scientifically made of accurate proportions of lead, zinc and silica, with aged linseed oil, pure drier and finest color pigments. Proved by public tests and endorsed by men of science. Analysis on every can.

Let's talk it over. Get a beautiful color card.
